Ziad Mohamed Shaban

Full Stack Developer

Mansoura & Cairo, Egypt | +20 110 246 6398 | ziadshaban.dev@gmail.com | linkedin.com/in/ziad-shaban | github.com/ziaaddd

PROFESSIONAL SUMMARY

Full Stack Developer specializing in building modern, high-performance web applications using **React.js** and **Next.js** (App Router) on the frontend, and **Express.js** with **MongoDB** (Mongoose) on the backend. Proficient in React Server Components, component-based architecture, state management with **Redux Toolkit**, and RESTful API design. Experienced in SPAs, SSR, SSG, custom hooks, WCAG accessibility, responsive web design, and PWA implementation with Core Web Vitals optimization.

TECHNICAL SKILLS

Frontend	**React.js Next.js TypeScript JavaScript (ES2015+) HTML5 CSS3 REST APIs Webpack Vite**
State Management	**Redux Toolkit Zustand React Query (TanStack Query) Context API Recoil Jotai**
Styling & UI	**Tailwind CSS Bootstrap CSS Modules Sass/SCSS shadcn/ui Material UI Framer Motion Styled Components**
Backend	**Node.js Express.js MongoDB Mongoose RESTful API Design JWT Authentication**
Database & Infra	**MongoDB PostgreSQL Supabase Firebase**
Tooling & DevOps	**Git GitHub GitHub Actions Vercel Netlify Postman Figma VS Code**

PROJECTS

Za-Cart — Full-Stack E-Commerce Platform

2024

React · TypeScript · Redux Toolkit · Supabase · React Bootstrap

- Architected a production-ready e-commerce app featuring multi-step checkout with address validation, real-time cart sync across sessions, and a complete order-management pipeline.
- Implemented dual authentication (Google OAuth + email/password) with role-protected routing to enforce customer vs. admin access boundaries.
- Engineered URL-synchronised product filters enabling shareable search states, and secured data access via Supabase Row Level Security (RLS) policies.
- Reduced bundle size with React lazy loading and code splitting, cutting Time-to-Interactive for non-critical routes. Delivered dark-mode with system-preference detection.

DevCamper — Bootcamp Directory & Management REST API

2024

Node.js · Express.js · MongoDB · Mongoose · JWT · bcryptjs · Nodemailer

- Engineered a production-ready RESTful API with strict MVC architecture, centralised error handling, a custom async handler, and a CLI database seeder for automated mock data management.
- Implemented advanced querying: dynamic pagination, field selection, sorting, range filtering (gt/gte/lt/lte), and geospatial search via MapQuest API to locate bootcamps within a given radius.
- Built complete JWT authentication with HTTP-Only Cookie storage, Role-Based Access Control (user/publisher/admin), bcryptjs password hashing, and secure email-based password reset via Nodemailer.
- Hardened security with Helmet, express-mongo-sanitize, XSS-Clean, HPP protection, and rate limiting. Implemented Soft Delete via Mongoose Schema hooks and a User Wishlist/Bookmarks system.
- github.com/ziaaddd/devcamper-api

DevFolio — Developer Portfolio & Dashboard

2024

Next.js · TypeScript · Tailwind CSS · Framer Motion · GitHub REST API

- Built a fully responsive, SEO-optimised portfolio with SSR via Next.js and near-perfect Lighthouse scores across performance, accessibility, and best practices.
- Integrated GitHub REST API for live contribution graphs and repo stats; deployed on Vercel with automated CI/CD via GitHub Actions.
- Applied a custom Tailwind CSS design system with smooth Framer Motion page transitions and consistent light/dark theme support.

PROFESSIONAL EXPERIENCE

Front-End Development Trainee

2023 · 3 Months

Information Technology Institute (ITI) — Internship Programme

- Completed an intensive 3-month government-accredited programme covering HTML5, CSS3, JavaScript, Vue.js, and Bootstrap through to advanced component-driven development.
- Collaborated in team-based Agile sprints (stand-ups, reviews, retrospectives) and strengthened competencies in communication, problem-solving, and leadership through structured workshops.

Freelance & Independent Full Stack Developer

2022 – Present

Self-Directed — Remote

- Designed, built, and deployed multiple web projects across the full development lifecycle: requirements, design, implementation, deployment, and iteration.
- Expanded backend skills with Node.js, Express.js, and MongoDB alongside production frontend work in React and Next.js; maintained clean, documented codebases on GitHub.

EDUCATION

B.Sc. in Computer & Information Sciences

2020 – 2024

Mansoura University — Faculty of Computer and Information

- Cumulative Grade: **Good** · Graduation Project Grade: **Excellent**
- Coursework: Data Structures & Algorithms, OOP, Database Systems, Software Engineering, Computer Networks, Operating Systems.

ADDITIONAL INFORMATION

Languages	Arabic (Native) · English (Professional Working Proficiency)
Military Status	Service Completed
Open to	On-site (Cairo / Mansoura) · Remote · Relocation
